[illegible]

| Steps to Execute  | Expected Result  |
|---|--|
| <p>The property manager logs into the Xiangneng Smart Property backend system.</p> <p>Select "Community Management - My Communities."</p> <p>Click "Join Community."</p> <p>Select a community and click "Apply to Join."</p> <p>Check the "My Communities" list.</p> <p>Log in with the agent account, approve the request, and verify the status of the community under the property manager.</p> | <p>1-3. A new dialog box pops up, displaying a list of communities in the same city that have been added and approved, with correct community information.</p> <p>4. After applying to join, close the dialog box and return to the "My Communities" page.</p> <p>5. The newly applied community is displayed with the status "Under Review."</p> <p>6. When the community status changes to "Successfully Joined," the joined community will no longer appear on the join selection page for other property managers.</p> |
| <p>The property manager logs into the Xiangneng Smart Property backend system.</p> <p>Select "Community Management - My Communities."</p> <p>Click "Join Community."</p> <p>Select a community and click "Apply to Join."</p> <p>Check the "My Communities" list.</p> <p>Log in with the agent account, approve the request, and verify the status of the community under the property manager.</p> | <p>1. community status: Successfully joined</p> <p>2. The joined community will no longer appear on the join selection page for other property managers.</p> <p>3. The same PM account can switch community to manage</p>  |

|  |  |
|--|--|
| <p>The property manager logs into the Xiangneng Smart Property backend system.</p> <p>Navigate to "Community Management - My Communities."</p> <p>Click "Join Community."</p> <p>In the popup page, click the search bar.</p> <p>Perform searches using community names.</p>   | <p>1/2. Search conditions match and return correct results.</p> <p>3. Empty search returns all results by default.</p> <p>4. Incorrect search returns no results.</p>  |
| <p>1. The property manager logs into the Xiangneng Smart Property backend system.</p> <p>Select "Community Management - My Communities."</p> <p>2. Click "Join Community."</p> <p>Select a community and click "Apply to Join."</p> <p>3. Check the "My Communities" list.</p> <p>4. Log in with the agent account, reject the request, and verify the status of the community under the property manager.</p> <p>5. login with the agent account, check status of the community</p> | <p>The community status is "Failed to Join"; the property manager cannot manage the community, the community information is not visible in "My Communities," and other property accounts can choose to join.</p> |
